

~~SECRET~~  
*Office Memorandum* • UNITED STATES GOVERNMENT

TO : Project Review Committee

DATE: 18 May 1951

FROM : Comptroller

SUBJECT: OPC Project for the Purchase of Radio Equipment

1. The attached OPC project for the purchase of certain radio equipment has been pending for some time due to the lack of available funds. It will be noted from the attached memorandum dated 15 May 1951 addressed to the Comptroller from Acting Chief, Budget and Analysis Division, OPC, that funds in the amount of \$[REDACTED] have been recovered from various OPC projects which can now be allotted to this project, if approved. Further analysis of outstanding obligations and commitments at a later date may reveal that additional funds over and above the [REDACTED] may be made available for this purpose.

25X9A2

2. If it is considered advisable to stockpile large quantities of this type of equipment, it is recommended that the project be approved in the full amount in order that additional orders may be placed if funds become available.

25X9A2

3. At the present time, it is not known as to how much of the equipment will be purchased from vouchered or unvouchered funds. Therefore, it is suggested that the project be approved for either type of funds.
